20. UNDERTAKER ADDRESS

None

A stillbirth must be registered both as a birth and death. The date of death should be the date of delivery and the death certificate should further state, if known, the cause of the stillbirth and the period of utero gestation in months.

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers*, who receive a definite salary), may be entered as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

STATEMENT OF CAUSE OF DEATH.—Name, first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebro-*

spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid Pneumonia"); *Lobular pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Example: *Measles* (disease causing death), 29 ds.; *Bronchopneumonia* (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anaemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility, (Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Haemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL, septicemia", "PUERPERAL peritonitis," etc., all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as *probably* such, if impossible to determine definitely. Examples: *Accidental drowning*; *Struck by railway train—accident*; *Revolver wound of head—homicide*; *Poisoned by carbolic acid—probably suicide*. The nature of the injury, as fracture of skull, and consequences (e. g., *sepsis, tetanus*) may be stated under the head of "Contributory."

ADDRESS

C. P. Seachouse Sandpoint, Id

A stillbirth must be registered both as a birth and death. The date of death should be the date of delivery and the death certificate should further state, if known, the cause of the stillbirth and the period of utero gestation in months.

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc.* But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers*, who receive a definite salary), may be entered as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)* For persons who have no occupation whatever, write *None*.

STATEMENT OF CAUSE OF DEATH.—Name, first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebro-*

spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid Pneumonia") *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma, Sarcoma, etc.*, of (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc.* The contributory (secondary or intercurrent affection need not be stated unless important. Example: *Measles* (disease causing death), 29 ds.; *Bronchopneumonia* (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anaemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," "Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Haemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL, septicemia", "PUERPERAL peritonitis," etc., all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as *probably* such, if impossible to determine definitely. Examples: *Accidental drowning; Struck by railway train—accident; Revolver wound of head—homicide; Poisoned by carbolic acid—probably suicide.* The nature of the injury, as fracture of skull, and consequences (e. g., *sepsis, tetanus*) may be stated under the head of "Contributory."

BUREAU OF VITAL STATISTICS

BOISE,

11-14-13

Dr. L. F. Inman
Lewiston, Idaho

Dear Doctor:

We have received at this office a death certificate signed by you May 25th, 1913 for Gordon Reed of Lewiston, in which the cause of death is given as "Lung Fever." We are rather at a loss to classify this--not knowing whether the case was one of bronchial pneumonia, lobar pneumonia, or tubercular disease of the lungs. Will you kindly advise me fully concerning this?

I enclose copy of "Physician's Pocket Reference to the Inter-national List of Causes of Death." Our Vital Statistics Law, as amended at the 1913 Session of the Legislature, provides for the use of the Inter-national list by physicians.

Thanking you in advance for the courtesy of a prompt reply, I am

Very truly yours,

RECEIVED

NOV 28 1913

OFFICE
STATE BOARD OF HEALTH

State Registrar.

RF:JS

M.D.

*Dear Doctor you will
please correct by putting
it "Bronchial Pneumonia,"
yours truly
L F Inman M.D.*

J. J. Groseman Twin Falls

Idaho State Board of Health

BUREAU OF VITAL STATISTICS

BOISE, Nov. 14, 1913.

Dr. J. P. Morgan,

Twin Falls, Idaho.

Dear Doctor:

We have received at this office, the following death certificates:

James H. McCabe of Twin Falls,

Filed June 14, 1913

Cause of death, given as "pneumonia;

Ada Avilla Perry,

Filed May 29, 1913.

Cause of death given as "peritonitis."

Broncho Pneumonia
Secondary to Peritonitis.

We rather at a loss to classify these. Will you kindly advise us whether the case of pneumonia was one of bronchial pneumonia, lobar pneumonia or tubercular pneumonia; and whether the case of peritonitis resulted as a consequence of hernia, perforating ulcer of the stomach or bowels, or whether the case was a traumatic one?

I enclose copy of "Physicians' Pocket Reference to the International List of Causes of Death." Our Vital Statistics Law, as amended at the 1913 Session of the Legislature, provides for the use of the International List by physicians.

Thanking you in advance for the courtesy of an early reply, I am

Very truly yours,

M.D.

RF/FM
Enc.

BUREAU OF VITAL STATISTICS

BOISE, Nov. 14, 1913.

Dr. Frank Wenz,

Rathdrum, Idaho.

Dear Doctor:

We have received at this office, a death certificate filed by you June 2, 1913, for Vernon Lu Kanitsh in which the cause of death is given as "peritonitis." We are rather at a loss how to classify this. Will you kindly advise us whether this resulted as a consequence of hernia, perforating ulcer of the stomach or bowels or appendicitis, or whether the case was a traumatic one?

I enclose copy of "Physicians' Pocket Reference to the International List of Causes of Death." Our Vital Statistics Law, as amended at the 1913 Session of the Legislature, provides for the use of the International List by physicians.

Thanking you in advance for the courtesy of an early reply, I am

Yours truly,

Ralph Falk
State Registrar.

M.D.

RF/FM
Enc. 3

Dear Sir:

The above "peritonitis," was an acute attack, following and almost coincident with an attack of acute Entero-Colitis. The age of the patient to be considered, as this type of Peritonitis is rarely found in adults.

Yours truly F. Wenz.

BUREAU OF VITAL STATISTICS

BOISE, Nov. 14, 1913.

Dr. J. S. Springer,

Boise, Idaho.

Dear Doctor:

We have received at this office, a death certificate filed by you June 12, 1913 for Thomas Painter, in which the cause of death is given as "tuberculosis." We are rather at a loss how to classify this. Will you kindly advise me whether this was tuberculosis of the lungs, or of other organs?

I enclose copy of "Physicians' Pocket Reference to the International List of Causes of Death." Our Vital Statistics Law, as amended at the 1912 Session of the Legislature, provides for the use of the International list by physicians.

Thanking you in advance for the courtesy of an early reply, I am

Yours very truly,

Ralph Falk
Secretary.

M. D.

RF/FM
Enc. 3

This man had Pulmonary Tuberculosis for over 40 years - during the last years of his life he had a complication of the glands - also bowels -

DR. O. B. STEELY
POCATELLO, IDAHO

Pocatello, Idaho, Nov. 17, 1913.

Dr. Ralph Falk,

Secy State Board of Health, Boise, Idaho.

Dear Doctor:

In reference to the cause of death of J. Oichi I will state that I am not absolutely sure of cause of peritonitis.

He was under treatment for an extremely vicious attack of luteal disease at the time, when peritonitis developed suddenly and the patient died in twelve hours from the initial symptoms of inflammation.

I believe it was perforating ulcer of the bowels.

Yours truly,

RECEIVED

19. PLACE OF BURIAL OR REMOVAL Sweet DATE OF BURIAL June 19, 1913

20. UNDERTAKER Tabley Bros acting for C. D. Buckenish of Emmett Idaho. ADDRESS _____

A stillbirth must be registered both as a birth and death. The date of death should be the date of delivery and the death certificate should further state, if known, the cause of the stillbirth and the period of utero gestation in months.

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) *Spinner*, (b) *Cotton mill*; (a) *Salesman*, (b) *Grocery*; (a) *Foreman*, (b) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers*, who receive a definite salary), may be entered as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

STATEMENT OF CAUSE OF DEATH.—Name, first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebro-*

spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid Pneumonia") *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Example: *Measles* (disease causing death), 29 ds.; *Bronchopneumonia* (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anaemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility, (Congenital)," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Haemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL, septicemia", "PUERPERAL peritonitis," etc., all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: *Accidental drowning; Struck by railway train—accident; Revolver wound of head—homicide; Poisoned by carbolic acid—probably suicide*. The nature of the injury, as fracture of skull, and consequences (e. g., *sepsis, tetanus*) may be stated under the head of "Contributory."

RECEIVED

NOV 20 1913

SECRETARY'S OFFICE
STATE BOARD OF HEALTH

WINCHESTER, IDAHO, 11-17- 1913

Dr. Ralph Falk.

Bair, Idaho

Dear Doctor:

Your inquiry concerning
the cause of death: "infantile convulsion"
in Infant Nichols as given by me
at hand.

I disliked to send in such a
diagnosis but I was unable to
make a positive diagnosis and
no autopsy was allowed. The child
was apparently normal at birth
and up until a few hours before

death. The parents have lost
five infants in the same
manner without anyone being
able to ascertain a definite cause.

While syphilis is denied, I
believe that is the only thing
that cannot be ruled out under
the circumstances.

Yours very truly
Elton B. Rogers.

Boise, Ida.

My Dear Doctor:-

Your kind inquiry of recent date at hand and contents noted. Would say that it would be impossible to state the exact cause of the peritonitis in this case as there was no autopsy held and the patient had been under treatment in Missoula, Mont. before coming into our hands. When we received the patient he had a peritonitis so pronounced that we could not decide positively where the source of the infection began.

If you can advise further what you desire of us we will be pleased to assist you.

Very Respectfully,

RECEIVED

APR 2 1914

SECRETARY'S OFFICE
STATE BOARD OF HEALTH

O J Crosby

Twin Falls

State of Idaho,

County of Twin Falls, ss.

Amelia Batley, being first duly sworn, on oath deposes and says:
That I saw Amos John Churchyard on the night of June 30th., 1913, and
again on the evening of July 1, 1913; that the death occurred on the
last named date at about 5:30 P.M.; the cause of death as same appeared
to me was congestion ^{of lungs} caused by a cold causing choking and strangling;
that the death occurred at the home of the parents of said infant child
in the City of Twin Falls, Idaho at 519 Fourth Avenue West.

Christian Science Healer. Amelia Batley

Subscribed and sworn to before me this 2nd. day of July, 1913.

James W. Porter
Notary Public.
